

# TIP TIG

## COMPACT CLADDING SYSTEM

The TIP TIG Compact Cladding System joins all the power and functionality of TIP TIG into a new design for maximum cost-effective overlay welding on components up to a diameter of 40 in (1.02m) and a maximum weight of 4409 lb (2000 kg).

Because of its compact design, the TIP TIG Compact Cladding System is an extremely powerful cladding system, that provides simple operation, precise movements and comprehensive data logging capabilities.

## FEATURES

- Compact Design
- Quick Setup: All components are pre-installed, proofed and test-welded
- Wide range of TIP TIG GTAW torches
- Step motor precision for positioning
- Remote diagnostics, operation, monitoring and maintenance via network or internet connection
